

The Family to Family Network is a statewide parent support network that is designed to educate, strengthen, and support families of persons with disabilities, especially those who are on the wait list or in DSPD services. Volunteer network leaders are parents of individuals with special needs and link families to local resources, services, and disability-friendly events.

Connect with other families in person and online through workshops and activities. We are currently seeking Network Leaders in many areas. You will be supported in your local area by our team in Salt Lake. Your work will be in your community and focused on the needs of your community.

## Contact Us!
